DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Species II, claims 1-16, Figures 9-13, in the reply filed on 29 June 2006 is acknowledged.

Priority

Acknowledgment is made of applicant's claim for foreign priority based on applications filed in the United Kingdom on 27 September 2002 and 14 February 2003. It is noted, however, that applicant has not filed a certified copy of the United Kingdom applications as required by 35 U.S.C. 119(b).

Claim Objections

Claims 1-16 are objected to because of the following informalities:

Claims 1, 6, 11, 12 and 14-16 fails to comply with 35 CFR 1.75(i) that states "[w]hen a claim sets forth a plurality of elements or steps, each element or step of the claim should be separated by a line indentation."

Claim 1 incorporates the term "in use" (line 8). The use of optional and/or suggestive language "that does not require steps to be preformed or [] does not limit a claim to a particular structure" fails to limit the scope of the claim. (See M.P.E.P

Art Unit: 3653

2111.04.) Thus, said term is optional and/or suggestive, and thus, the claim language subject to said term is given no patentable weight.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "downstream end" (line 5) lacks sufficient antecedent basis.

Appropriate correction is required.

Allowable Subject Matter

Claims 1-15 are allowed subject to the above-mentioned claim objections. Claim 16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

The Examiner considered Patent Number 269,461 by Rakestraw ("Rakestraw") to be the prior art most closely related to the Applicant's claimed invention. Although Rakestraw discloses a vibrating apparatus that separates debris from articles, and has both upper G/H/H' and lower Y/J vibrating trays, it fails to disclose or suggest a configuration such that articles are passed through perforations in said lower tray and debris travels along said lower tray to a downstream end as claimed in the Applicant's independent claims 1, 11 and 16.

Conclusion

The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Number 6,053,807 by Metzger et al because of its coin tray 2,

Patent Number 1,345,858 by Jenkins because of its perforations 36 and 37, and

Patent Number 545,185 by Yost because of its upper tray I.
